

COLLECTORS BOX SET

JBD X BOUTIQ

LIMITED EDITION COLLAB

Hand-blown glass by Jerome Baker Designs,
boxed for Boutiq. Massachusetts launch.

DESIGN REVIEW 7 AUG 2026

WHERE WE LANDED 4 AUG CALL

AGREED ON THE CALL

28

ALL IN

25 base plus the 3
royalty. Everyone aligned.
Final quote follows the
locked layout.

10000

UNITS

All into Massachusetts.
500 committed off the
launch, three salespeople
on it.

2

SKUS

Indica and Sativa. Hybrid
is out - they are all
hybridised anyway, and it
only split the run.

NOV 1

LANDED

Ten weeks out. Samples
in hand for the buyers
golf tournament on 27
October.

THE SET

FOUR PIECES, ONE BOX

Flower jar

7 g, JBD x Boutiq label, Indica or Sativa. Supplied by Jerome Baker.

Clearboy hammer

Hand-blown boro 3.3, 140 mm, fumed and frit-rolled with clear marbles.

Nug jar

92 mm glass, 38 mm mouth, cork lid, pressed JBD mark.

Matches

Flat-pack wood matches. Not rolling papers - the big matchbook is the insert in the top tray - confirm it reads as the matchbook and not a pre-roll.

TWO SKUS

INDICA AND SATIVA

INDICA

SATIVA

The bulk market swings between Indica-heavy and Sativa-heavy month to month, so the set covers both and skips hybrid. Accents carry the difference. The inner box stays one tooling.

LID TREATMENTS

THREE WAYS TO CLOSE IT

C 1

Full pattern lid, black body.

C 2

Pattern top, black sides and sleeve.

C 3

Black lid, lockup only. Quietest of the three.

Emboss blind, in colour, or in foil. Foil was the preference in the room.

CONSTRUCTION

STATIC BOX, VARIABLE SKIN

Hard leather-look box with a leather texture and punched seams. Inner box plus an outer sleeve.

Static

Inner box, foam tray tooling, glass.

Variable

Sleeve, beauty card, the printed layer over the foam, and the inner lining.

That split is what lets one box carry two SKUs, and lets the artwork move without retooling.

THE GLASS

REVERSE-ENGINEERED FROM ONE ORIGINAL

Both pieces come off a solid model measured from the hand-blown original, so the shop gets STEP rather than a picture. Fumed and frit-rolled, with the linework spun on before the marbles are set.

COLOUR IS NOT LOCKED

The teal shown is indicative. Jason is confirming which hues the factory can actually pull, and fuming shifts the colour again.

Clearboy hammer

140 mm overall. Head 68 long, 42 x 37 oval section. Bowl 25 opening to a 3 hole. Stem 14 OD on an 8 bore.

Nug jar

92 mm glass on a 44 straight cylinder. 38 mm mouth, tapered cork. Frit band and seven clear marbles at the rim.

WHAT HAS TO CLOSE NEXT

Pattern

The art on these renders is the Jerome Baker New York Drop 1, used to mock up size and shape. It is not locked. Boutiq pixel and Game Boy artwork replaces it.

Glass colour

Jason to come back with the hues the factory can actually make. The tray and the jar then follow that colour.

Boutiq mark

The lid carries the Boston mark. High-resolution logo pack needed before artwork goes final.

Insert

Confirm the slim tray item is the flat-pack matchbook.

TIMELINE

TEN WEEKS, WORKING BACK

Eight weeks of production is the long pole, and the design lock is what starts that clock. Pattern and colour are the critical path, not the tooling.

JBD X BOUTIQ

LETS LEVEL UP

Send the Boutiq artwork and the Boston logo pack and the layout can be locked this week.
