JBD X **BOUTIQ**

# THE COLLECTORS BOX SET

Hand-blown glass by Jerome Baker Designs,  
in a stitched leatherette case.

## THE CASE

# BLACK LEATHERETTE, STITCHED AND NUMBERED

A hard case with a leather grain, punched seams and a hinged lid. The mark is struck into the lid itself.

|                |                                         |
|----------------|-----------------------------------------|
| <b>Finish</b>  | Blind emboss, colour emboss or foil.    |
| <b>Lid</b>     | Hinged, with the lockup on the face.    |
| <b>Edition</b> | Numbered on the side panel.             |
| <b>After</b>   | Keeps its job once the glass comes out. |

THE SERIES

# ONE CASE, TWO SLEEVES

TEAL

MAGENTA

The case does not change. The printed sleeve does, and that is what makes the set collectable - two colourways to a series, each one numbered, with the glass inside matched to the sleeve it ships in.

INSIDE

# CUT TO FIT, PIECE BY PIECE

## Hammer bubbler

Hand-blown boro, fumed and frit-rolled, set with clear marbles.

## Nug jar

Thick-walled glass with a tapered cork and a pressed JBD mark.

## Flower jar

Labelled and sealed, in the colourway of the set.

## Matches

Flat-pack wood matches.

Every piece sits in its own cut recess, so the set travels and displays the way it was packed.

## THE PIECE

# CLEARBOY HAMMER BUBBLER

Worked from one hand-blown original. Silver or gold fume under a transparent wash, frit rolled into the bowl end, and clear marbles set into the band by hand.

**Length** 140 mm, standing on its own foot.

**Chamber** 68 mm, shaped oval rather than blown round.

**Glass** Borosilicate, thick-walled, no seams.

## THE PIECE

# NUG JAR AND CORK

A straight cylinder in the same glass, closed with a tapered natural cork. A band of frit under the rim, seven clear marbles around the opening, and the JBD mark pressed into the wall.

|               |                                                     |
|---------------|-----------------------------------------------------|
| <b>Height</b> | 92 mm of glass, plus the cork.                      |
| <b>Mouth</b>  | Wide enough to reach into, corked to keep it fresh. |
| <b>Mark</b>   | Pressed into the glass while it is still molten.    |

COLOURWAYS

# FUMED, SO NO TWO MATCH

Fume is metal laid onto hot glass. It sits under the colour and shifts as the piece is used, so the surface keeps moving between silver, violet and a warm edge.

## Teal and silver

Bluish teal body, silver fume, teal frit.

## Magenta and gold

Magenta body, gold fume, magenta frit.

Renders shown. Every piece is worked by hand, so the fume and the marbles fall differently on each one.

## TIMELINE

# FROM SIGN-OFF TO SHELF

### SIGN OFF

#### **This week**

Design approved as shown,  
artwork goes final.

### EIGHT WEEKS

#### **Production**

Glass blown, cases made,  
sets packed and shipped.

27 OCT

#### **Samples**

Full-size sets in hand,  
air-shipped, ahead of the  
buyers tournament.

1 NOV

#### **On shelf**

In store for the holiday run.

Eight weeks of production is the long pole, and it does not start until the design is locked. Sign-off is what puts the set on shelf for the holidays.

# READY FOR YOUR SIGN-OFF

Approve the design as shown and artwork  
goes final this week.
